SKYSYNC

SkySync Go!

Simple, cost-effective content migration across popular cloud storage services or on-premises network file shares.

SkySync Go! -- for common use-case migrations

SkySync Go! can be deployed in minutes within Microsoft's highly-secure Azure cloud or optionally on workstations or server hardware via a simple installer routine.

SkySync's intuitive web interface guides you through a simple setup process, step-by-step. **Within minutes, you'll be ready to migrate files.**

SkySync Go! fully-supports major cloud platforms and network files shares

No impact to users or operations

SkySync's continuous copy mode ensures that target system files are up-to-date in real-time and precisely mirror the source system.
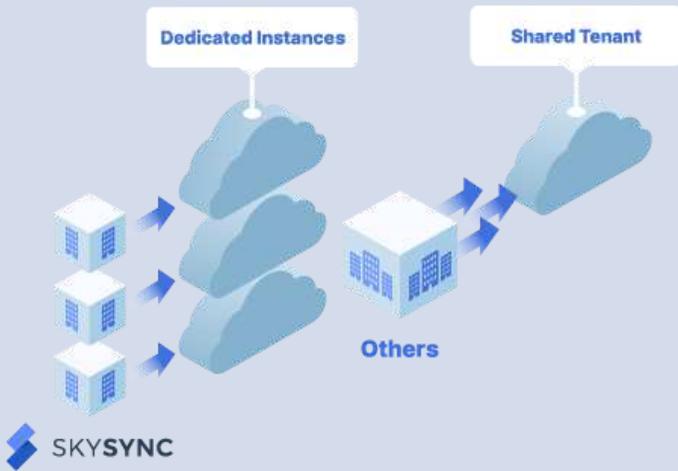

SkySync's true bi-directional hybrid/sync capabilities enable organizations to leverage and preserve content across on-premises systems and any cloud service.

Content without boundaries.

The highest performance and security

Dedicated Instances

Shared Tenant

SKYSYNC

Each SkySync Go! migration is a customer-dedicated cloud instance, providing unlimited scalability and enterprise–grade security.
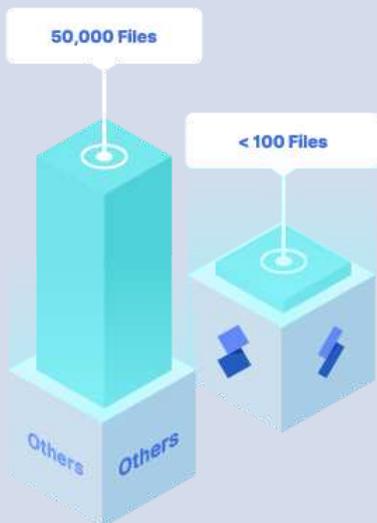

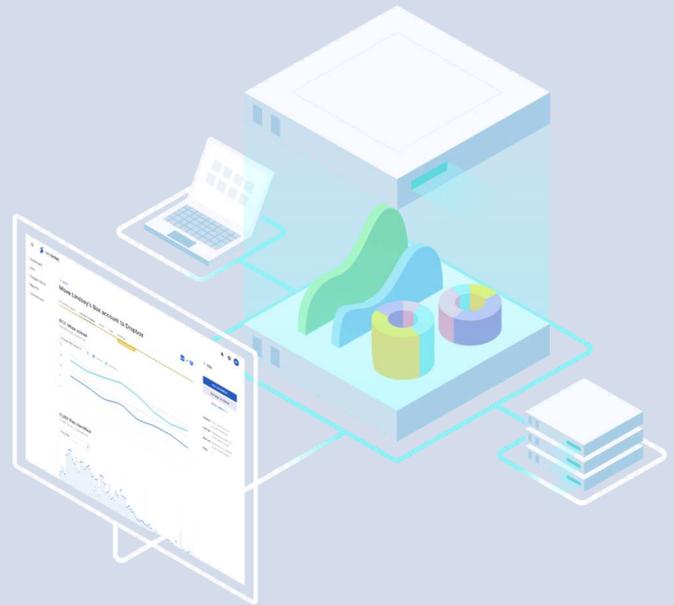

For on-premises deployments, files are streamed direct to the cloud service—not through a proprietary presence point or any other secondary cloud software.

Advanced content discovery and analysis

SkySync's advanced analysis capabilities provide deep insight into existing content and file sharing behaviors, as well as simulates the entire file migration.

This enables precise project outcomes prior to transferring any files.

Leading file transfer error resolution rates

50,000 Files

< 100 Files

Others   Others

Per 1mm files that require manual intervention

Industry benchmarks for file transfer error resolution rates are 95%—**SkySync's rates often exceed 99%**. Translation: **SkySync delivers up to a 500x reduction** in the number of files that require manual intervention.

For the negligible level of remaining files that do require manual remediation, SkySync automatically organizes, groups, and presents these files for the administrator or file owners to resolve.

SkySync enables the world's most successful enterprises with total control over and unbounded access to their content, empowering their evolving modern workforce. We connect disparate storage platforms, unite silos of information, and synchronize content spread across the enterprise—at scale. We enable our customers to achieve singular access and unified control over their content, so they can support the evolving needs of a modern workforce.
