# Move campus to the cloud

Intelligent file migration across cloud and on-premises platforms, with no disruption to campus operations.

Take higher education even higher

If you're looking to migrate your institution to the cloud for the first time or considering a move to a more cost-effective cloud solution, it's time to study up on digital transformation.

SkySync's enterprise content orchestration platform enables higher education institutions to synchronize or migrate large volumes across cloud and on-premises platforms at scale. We've helped colleges and universities across the globe move their campus to the cloud with no disruption to staff, students, or operations.

Office 365   OneDrive for Business   Google

box   Dropbox BUSINESS | ENTERPRISE   NFS | SAN | NAS

Avoid vendor lock-in with SkySync's wide array of platform connectors. Don't see yours? We've got more!

Helping colleges and universities...

Modernize campus IT
Eliminate the risk of a system failure or data loss by decommissioning aging hardware. Increase security and peace of mind by automatically migrating to more modern platforms.
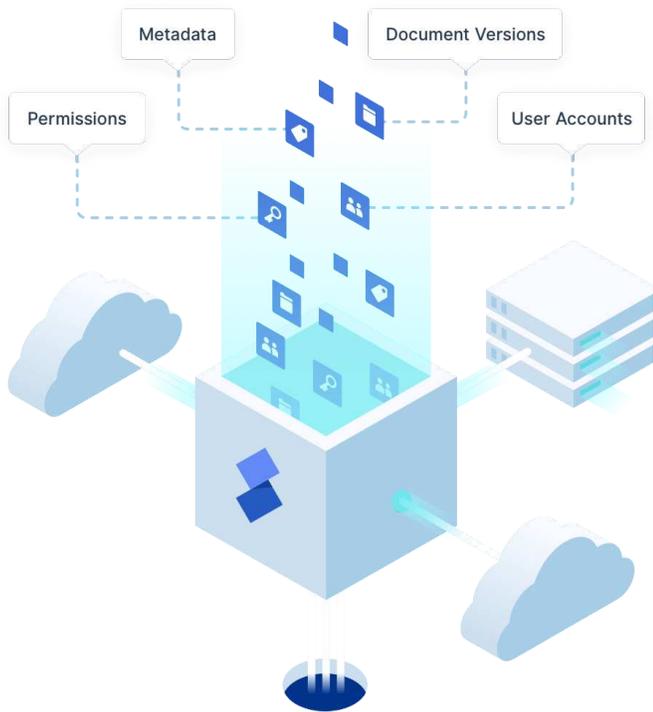

Decrease costs and drive better ROI
Better position your institution to save costs and drive ROI by staying agile with your content. Seamlessly transition to more cost-effective vendors and reduce the maintenance cost of legacy systems.

Deliver effective collaboration for students
Enable staff and students to focus on more on their academics than file management by streamlining storage and secure collaboration across the institution.

Digital transformation for institutions of any size

Whether your institution has a few terabytes of content spread across hundreds of thousands of user accounts, or petabytes of files on a local server, SkySync can handle workloads of any size.

SkySync brings advanced content integration and orchestration capabilities to your fingertips — streamlining complex scenarios, as well as reducing risk, timelines, and overhead. With SkySync, your campus IT will spend less time and energy on file migration so you can get back to business as usual.

Designed to simplify complicated migration projects

✓ Zero impact to end-users, existing systems, ancillary integrations or business operations

✓ Full migration simulation and analysis, predicting outcomes and providing deep insight into all organizational content

✓ Supports ECM platforms, network file systems, SharePoint and custom on-premises storage systems

✓ Preserves existing file governance and retention policies

✓ Automatic transformation and management of forbidden target system file names, characters & types

✓ Continuous copy mode executes file transfers in the background, temporarily synchronizing source and destination

✓ Selectively sync files and folders based on rules, events, metadata, and filters

✓ Extensive reporting and audit trail of all file transfers

SkySync is an Internet2 NET+ Program Member

SkySync enables the world's most successful enterprises with total control over and unbounded access to their content, empowering their evolving modern workforce. We connect disparate storage platforms, unite silos of information, and synchronize content spread across the enterprise—at scale. We enable our customers to achieve singular access and unified control over their content, so they can support the evolving needs of a modern workforce.
